Summary

Software Engineer skilled in building scalable full-stack applications with **Java, Spring Boot, Angular, and SQL**. Experienced in designing REST APIs, optimizing databases, and developing secure enterprise-grade systems. Strong foundation in problem-solving, distributed systems, and real-time data streaming (Kafka). Passionate about delivering high-quality software solutions that improve efficiency and user experience.

Education

Savitribai Phule Pune University, BE in Computer Engineering (June 2020 – June 2024)

- CGPA: 8.66/10

Experience

Software Engineer, LTIMindtree – Mumbai, India (Dec 2024 – Present)

- Developed and maintained **Java Full Stack** applications using **Spring Boot** for backend and **Angular** for frontend, ensuring scalable and efficient solutions.
- Worked with relational databases including **MySQL** and **PostgreSQL**, performing API development and testing using **Postman**.
- Gained strong knowledge of **Core Java** concepts and best practices while contributing to multiple real-world projects across diverse domains.

Certifications

Oracle Certified Professional: Java SE 11 Developer

Projects

Onboarding Portal Enhancement (Enterprise Banking Project)

- Automated candidate data validation for an enterprise onboarding portal, eliminating manual CSV-based processes.
- Built **5 core modules** (Skill-Role Mapping, Role Management, Skill Assessment, Role Info, SOW) with real-time validation.
- Improved data accuracy and reduced onboarding errors through scalable, modular backend design.
- **Tech:** Java, Spring Boot, Angular, MySQL, REST APIs

IPL Progressive Project

- Built a full-stack application for managing IPL player and match data with efficient tracking and updates.
- Implemented CRUD operations and match statistics visualization with a modular architecture.
- **Tech:** Spring Boot, Angular, TypeScript, REST APIs

Face Recognition Attendance System

- Created an AI-powered attendance system that recognized faces with **95% accuracy**, storing logs with timestamps automatically.
- Deployed via a web interface using HTML, CSS, and JavaScript.
- **Tech:** Python, OpenCV, HTML, CSS, JavaScript

Skills

Languages: Java, Python, SQL, TypeScript

Frameworks & Tools: Spring Boot, Angular, Kafka, Postman, MySQL, Git, Swagger, GitHub

Core Skills: Data Structures and Algorithms, Problem Solving, Object-Oriented Design
